### Perfect parking every time

A tennis ball hanging from a string is a classic way to indicate where to stop your vehicle in your garage. But if you're looking for a solution that's equally low-tech but less obtrusive, try the Parking Target from Innovative Products International. An adhesive backing holds the 1-1/4-in.-tall, 3-1/2-in.-wide and 16-in.-long strip to the floor. When your front tire bumps against it, you stop the car. Genius!

The Parking Target is ideal for crowded garages where it's a tight fit between the toolbox or workbench in front of the vehicle and the garage door in back. It's available for \$14 on the company's Web site.
